

Reliability, transparency, and security: these are some of the main benefits of blockchain technology. Find out how you can leverage blockchain technology in your daily operations.

Business on the Blockchain

by Blockchain Foundry Inc.

Leveraging blockchain technology to tokenize your assets is promising to change how you interact with your industrial, commercial, and technological ecosystems. This powerful process can be deployed in many ways to ensure you receive the most out of your systems.

Creating Token Assets on the Blockchain

Blockchain Technology & You

Blockchain technology is known for its many benefits. Due to proven encryption processes and a method called “decentralized consensus”, blockchains are extremely hack-resistant. Each blockchain ledger consists of a set amount of easily tracked data “anchors”; this imbues your systems with transparency, easy validation, accountability, and fraud prevention. Thanks to built-in redundancy from decentralization, your systems are guaranteed 100% up-time.

TOKENIZED ASSETS

There are many ways to leverage tokenized assets:

- Creating, tracking, and issuing intangible assets.
 - ▶ Items like, copyrights, patents, and similar documents, are considered intangible assets.
- Selling, buying, distributing, and tracking fungible goods.
 - ▶ Items like, oil, gold, or wheat, are considered fungible goods.
- Selling, trading, and buying of non-fungible goods.
 - ▶ Items like, art and real estate, are considered non-fungible goods.

Blockchain Foundry has the Experience

At Blockchain Foundry, we use Hybrid Blockchain Technology (HBT), this technology maintains scalability of your network, and works by time-stamping and “anchoring” your data stored off-chain to the blockchain ledger. Each ledger consists of a set amount of data “anchors” stored in a decentralized fashion. We use this process in our Blockmarket Suite. Blockmarket uses “Aliases” as a way to allow our users to create their own digital identity on the blockchain.

Blockchain Foundry can help you implement your blockchain ecosystem visions. We provide custom blockchain development, consulting, and integration solutions that will allow you to leverage blockchain technologies into your business use cases. Blockchain Foundry is here to help you build your best future. Contact us to learn more.
